## **QUALITY POLICY for 2023-2030**

**Strengthening the positions of FSBEI HE Academician Ye.A. Vagner PSMU MOH Russia as a center of education, research, healthcare and culture in the system of continuous medical education, corresponding to the level of national and foreign schools.**

The University is aimed at total satisfaction of needs and expectations of all stakeholders in obtaining high quality medical education.

The main directions of the Quality Policy:

1. Providing affordable high-quality medical education for the population of Perm region and other regions of Russia that meets the requirements of innovative socially-oriented development of the Russian Federation.
2. Globalization of medical education and research by expanding international scientific contacts and increasing the academic mobility of the University.
3. Improving the efficiency of fundamental and applied scientific investigations, strengthening human and scientific potential, creating conditions for sustainable demand for innovative products and their implementation in practical healthcare and state sanitary and epidemiological service.
4. Organization and development of activities of clinical-scientific-educational center on the basis of Clinical Multi-field Medical Center (CMMC).
5. Formation of sustainable highly professional personnel based on preservation, renewal and development of the staff of scientific and pedagogical workers.
6. Improving the infrastructure and achieving financial sustainability of the University.
